AQS bags NOV Pumps distributor deal

Mono Pumps UK, a subsidiary of US based NOV (National Oilwell Varco), has joined forces with AQS Liquid Transfer, the South African based subsidiary of AXFLOW Sweden.

AQS Liquid Transfer (Pty) Ltd is an importer and distributor of pumps in Southern Africa which was formed in 1994 from a company called AQS Industries. From its 10 branches today, the company provides a nationwide sales and pump repair service encompassing a wide range of pump types. Throughout the years AQS has built a strong market position in South Africa serving the mining, industrial, utilities and agricultural markets.

Mono UK has a long history of co-operation with the AXFLOW Group of companies within its European operations. AxFlow is a major distributor of high quality liquid fluid handling equipment with operations in 27 European countries, representing world leading manufacturers and providing comprehensive technical services tailored to the needs of a multitude of process industries. This exciting agreement puts AQS Liquid Transfer in a position to further enhance its product offering in the mining, chemical, sewage and water sectors.

NOV is a leading provider of oilfield products and services to the worldwide oil and gas industry and has been since 1841. The company's headquarters are in Houston, USA and it has over 100 subsidiaries with over 1,200 sites around the world, employing 63,000 people. Mono UK first began manufacturing progressing cavity pumps in 1935 and their heritage is built on a world-renowned design. Mono UK has continued to engineer industry-leading pump ranges for over 70 years, together with their other recognized brands for grinders, screens and packaged pumping systems which are ideally suited for the efficient maceration, screening and pumping of waste water flows.

Mono UK's commitment to quality is reflected in Mono becoming the first progressing cavity pump manufacturer to be certified to ISO 9001, with the latest achievement to the upgrade quality management system ISO 9001:2008. Their most recent award is to the ISO 14001 certification.

By constantly developing and acquiring new technologies and services to better serve future customer requirements, they will continue to be the premier source for diversified products worldwide.

MONO UK through AQS LT brings many new technologies and product advances to a South African market that has been starved of such progress for some time.

Most famous is the EZSTRIP™ range of transfer pumps, cake pumps, TR munchers, API 676 pumps and mine de-watering packages that offer in-place repair and up to 80% improvements in repair turnaround time.

Advances in product offerings to ensure extended lifetime and reduced lifecycle costs are critical to specialized industries and offer AQS LT some exciting opportunities of expansion in the fields of food & beverage, oil & gas and paper & pulp.

AQS LT has been very active in the South African market since its inception. Its rapid growth in the South African market can be attributed to forming partnerships with world leading manufacturers and adopting an attitude of dogged commitment to nurture and grow these relationships.

AQS LT is proud to be the sole distributor for AODD brands Sandpiper and Versa-Matic, as well as the creators of the VEGA™ range of products. MONO™ will be traded under the NOV flag and perfectly rounds off the range of products and technologies within the AQS LT stable.

The marriage within AQS LT of positive displacement, progressive cavity and centrifugal technologies give the customer an unbiased opinion of the advantages of each and ensures that the solution meets the brief in all aspects.
